

The Royal School Wolverhampton

Brief

To provide and supply 3 classrooms with toilets for students aged 11-16 for the Royal School in Wolverhampton whilst the school was being refurbished.

Solution

Delays in the school's refurbishment, resulted in the school requiring 3 classrooms late in the summer term; however, the classrooms were needed for the first day of the new school year in September, thus the ESFA requested a full turnkey package. The ESFA authorised the Sibcas design for 3 general classrooms with WCs and accessible provisions, furniture, ramps, steps, alarms, data package, and all civils and groundworks after presenting the customer with a design and demonstrating prior delivery of turnkey packages.

Sibcas was the Principal Contractor for the entire duration of the project. Sibcas were also granted the complete contract in the last week of July following a competitive pricing procedure and began work the first week of August.

Challenges

The site was next to a sports and leisure complex that would remain open throughout the duration of the project. Sibcas therefore had to take all necessary safeguards to protect

the safety of all project stakeholders and members of the public. Sibcas created a building phase plan that included a detailed site set-up as well as a traffic and pedestrian control strategy to ensure a safe yet productive site.

Outcome

The building was delivered and handed over on budget and earlier than the client expected. The on-site management and planning were a great success leaving an extremely satisfied customer.

Testimonial

"Excellent overall experience. Consistency from sales through to handover."

"Sibcas provided experience and knowledge through the design phase, a near perfect installation and handed over units to an excellent standard. They were also very competitive against their direct rivals in the market."

Project Details

Name:
The Royal School Wolverhampton

Location:
Penn Road, Wolverhampton, WV3 0EG

Client:
ESFA via Turner & Townsend

Building Type:
27.45m x 9.75m
